Summary

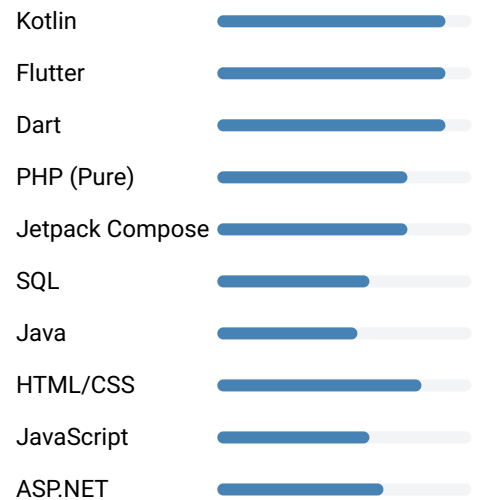

I began my career in Android programming in 2016, developing applications with Java and Kotlin for about 4 years. Since 2020, I have started to learning and using Flutter and have developed a strong passion for it. So I started working on Flutter alongside Kotlin and I continued to expand my knowledge in both of them and I love to learn more and explore deeper in mobile programming.

Throughout my career, I have worked as a mobile developer for 4 companies, contributing to the development of many successful applications. Additionally, I have some experience with PHP, JavaScript, and front-end development.
